

5.2v - 8.5v Adjustable Voltage Regulator

How To Connect The Regulator

The Unit will have several leads coming out from the side, each lead is color coded with a piece of shrink wrap tubing towards the plug. Use the list below to assist with connecting the Regulator.

DEANS - To Battery

BLUE - To Battery (not used if using Deans)

RED - To Rx Battery Input

WHITE - To Rx Rudder Channel
(or Gyro Output)

YELLOW - To Gyro
(or Rudder Servo)
